

Technical Data Sheet

Nutraberry Raspberry Seed

Product Code: RRS

Nutraberry Raspberry Seeds are a non-extracted product of raspberry (*Rubus Idaeus L.*). The “seed cake” of the crushed fruit is used intact without further processing. The starting material is ≈30% flesh before drying. The source of these seeds are from fruit grown and harvested in the state of Washington where it is harvested only once per year. The processing of the “seed cake” is minimal, only drying at below 170°F, but above 150°F.

TYPICAL CHARACTERISTICS

Description	raspberry seed
Latin Binomial	<i>Rubus Idaeus L.</i>
Country of Origin	Grown and processed in the United States in the state of Washington
Particle Size	Whole seed, approximately 10 mesh
Appearance	Characteristic of raspberry seeds

SPECIFICATIONS	LIMITS	METHODS
Water Activity	LT 0.5	CMMEF
Heavy Metals		
Lead	LT 1.5 ppm	ICP-MS
Arsenic	LT 2.0 ppm	ICP-MS
Cadmium	LT 0.5 ppm	ICP-MS
Mercury	LT 0.5 ppm	ICP-MS
Microbiology		
Total Aerobic Plate Count	NMT 100 cfu/g	FDA-BAM
Yeast and Mold	NMT 100 cfu/g	FDA-BAM
Coliforms	Negative	AOAC
E. coli	Negative	CMMEF
Salmonella	Negative	AOAC
Staph. Aureus	Negative	AOAC
L. mono	Negative	AOAC
